### DETAILED ACTION

Receipt is acknowledged of Applicant's amendment filed on September 21 and October 15, 2001.

Claims 73-87 are added.

Claims 1-87 are presented for examination.

#### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 12-13, 16-19, 22-35, 38-47, 49-78, 80-87 are rejected under 35 U.S.C. 102(a) as being anticipated by Hoshizaki et al.'530.

With reference to Figs. 10-16a-f, col. 10, line 42 to col. 14, line 20, Hoshizaki discloses the claimed invention including: a) top ring 202 with pressurized fluid 281 being fed into discrete concentric chambers 310, 312; b) presser ring 291.

#### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 14-15, 20-21, 36, 37, 48, 79 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hoshizaki et al.'530.

Art Unit: 3723

Hoshizaki has been discussed above, but does not disclose the presser ring being pressurized by air.

Official Notice is taken that air actuator is well-known in the art to control the presser ring in the desired position to control the edge polishing of wafer. Thus, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the polishing apparatus of Hoshizaki with an air actuator to control the presser ring in the desired position to control the edge polishing of wafer.

***Allowable Subject Matter***

5. Claims 1-11 are allowed.

***Conclusion***

6. Applicant's submission of an information disclosure statement under 37 CFR 1.97(c) with the fee set forth in 37 CFR 1.17(p) on September 21, 2001 prompted the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 609(B)(2)(i). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3723

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
